Before volunteers began any work at the station, we were all required to take part in a Health & Safety briefing. This was an official requirement so that we could understand the workings of the station and any hazards that may ensue.

This briefing was conducted at the station and delivered by Simone, the Station Manager and was a most interesting and informative hour. We were then eligible for an ID Badge and a Hi Viz Vest, of which both must always be worn. It also meant that we are covered by the West Midlands Railway Insurance.

This briefing needs to be repeated every two years and our second one was carried out by watching a video about health and safety of volunteers.

Pictured here, by the step way to the station, are two people who support us with our projects to ensure that we achieved our aims and those of the station.
