

This is the style of wooden planter we hope to have installed on the platform.

The planter is ‘simply’ made, onsite, of ‘new’ railway style sleepers, all bolted together so they cannot be moved when full.
They are not fixed to the ground, to enable easy dismantling if ever required.
They are lined with polyethylene sheeting prior to being filled with compost.
You can see above, the plaques affixed to these planters on Droitwich Spa station

Our planter size will be

2500 Long x 600 wide x 400 High
